1. Ignore this message. To quit from this screen close the window.
2. This is where the selected region is typed. On the old screen this was typed at the bottom of the screen.
3. The new screen displays the IP Address and Port number. Users need not be concerned with this information.
4. Messages will be displayed here. For example, if an invalid value is entered the message 'THE NAME YOU ENTERED IS INVALID' will appear here.
